

■ SPA friendly to both body and the environment thanks to natural ingredients

SPA run by SpaFinder Japan Co., Ltd., eliminates the use of chemical substances as much as possible. SPA offers a wide variety of treatments that richly incorporate carefully selected natural ingredients, ranging from body care before and after getting a suntan to facial treatments, and beach manicures and pedicures. At SPA's exclusive shower cubicles, bath gels, shampoos and conditioners bearing the Cowshed body care brand (from the United Kingdom) are available. At the adjacent retail shop, SpaFinder's original sunscreen cream with pearls, or with the scent of mint citrus and other fragrances are on sale. Cowshed items, known for their fine natural ingredients carefully selected from all over the world as well as their highly therapeutic effects, are also on sale, including the Bath & Body Travel Set, an eco-friendly shopping bag and lip balm.

■ An Italian staple and Kamakura food products

One of the members of this project team is acquainted with Girolamo Panzetta and lived in Italy for two years. He was trained at a pizzeria and mozzarella factory in Naples and offers the authentic taste of a *pizzaiolo* (pizza maker).

The highlight of the CAFFÈ's menu is *Pizza Fritta* (deep-fried pizza) and *fritt* (fritter). Though these may not be so familiar to some people in Japan, they are popular dishes in Naples – the birthplace of pizza – and staples on the beaches of Italy. We recommend you take big bites of sizzling *Pizza Fritta* or *fritt* and eat it like a snack. It goes best with white wine or soda. In addition to these two items, a wide variety of dishes using fresh vegetables and seafood from the Kamakura and Miura areas are also available.
